

Amino-Max[®]

Aids Anabolic Metabolism & Builds Cellular Energy (ATP)*

- Optimizes Recovery time from exercise or stress*
- Supports cardiovascular health*

Amino-Max[®] is a nutritional anabolic support formula featuring Albion[®] state-of-the-art mineral amino acid chelates. It provides foundational cellular nutrition in a highly absorbable, bioavailable form. Amino-Max[®] supports the body's natural ability to synthesize protein, sustain energy and optimize recovery time after strenuous exercise or stress by providing the material building blocks essential for anabolic metabolism.*

New bottle rollout expected December 2021

Supplement Facts

Serving Size: 3 capsules
Servings Per Container: 30

	Amount Per Serving	% Daily Value
Vitamin B6 (as pyridoxine alpha ketoglutarate)	10 mg	588%
Magnesium (as creatine magnesium chelate† and magnesium glycyl glutamine chelate†)	75 mg	18%
Zinc (as zinc arginate chelate†)	1 mg	9%
Chromium (as chromium nicotinate glycinate chelate†)	100 mcg	286%
Creatine Magnesium Chelate (Creatine MagnaPower®†)	600 mg	*
Magnesium Glycyl Glutamine Chelate†	320 mg	*
L-Isoleucine	75 mg	*
L-Leucine	75 mg	*
L-Valine	75 mg	*
L-Alpha-Glycerophosphatidylcholine	75 mg	*
L-Carnitine (as L-carnitine tartrate†)	75 mg	*
Alpha Lipoic Acid	10 mg	*
Vanadium (as vanadium nicotinate glycinate chelate†)	0.75 mg	*
Boron (as Bororganic Glycine†)	0.75 mg	*

* Daily Value Not Established

Other Ingredients: Hydroxypropyl Methylcellulose, Maltodextrin, Microcrystalline Cellulose, Citric Acid, Silica, and Magnesium Stearate.

DOES NOT CONTAIN: Wheat, gluten, milk, eggs, fish, crustacean shellfish, tree nuts, peanuts

Available in 90 capsules

SUGGESTED USE: 3 capsules daily or as directed by your healthcare practitioner. Not to be used during pregnancy.

†Amino acid chelates and complexes supplied by Albion Human Nutrition

FEATURING

Magnesium Glycyl Glutamine

Magnesium Glycyl Glutamine is a patented, chelated complex of magnesium, glycine and glutamine. Glutamine, particularly when combined with glycine and magnesium in a chelated complex, helps the body to recover more quickly and prevents the natural breakdown of muscle tissue that occurs during endurance exercises, as well as from everyday stress and aging. Magnesium is the most important major mineral needed for bone and muscle strength, heart health, central nervous system function, correct assimilation of calcium and potassium and efficient enzymatic function.*

Creatine MagnaPower™

This chelated complex of creatine and magnesium enhances muscle performance, especially during repeated bouts of brief, high-intensity exercise and during endurance activities. Creatine improves the body's ability to sustain high power outputs while reducing muscle fatigue after vigorous exercise. Magnesium enhances creatine's recognized ability to renew ATP levels rapidly. ATP renewal creates more energy, which encourages optimal physical performance.*

Alpha-Glycerophosphoryl Choline

Alpha-Glycerophosphoryl Choline (A-GPC) is a phospholipid metabolite found in high concentrations in neuronal membranes. It works to increase overall strength and to support natural levels of human growth hormone. A-GPC also helps improve cognitive function and liver health.*

L-Carnitine

This amino acid, essential for the transport of long chain fatty acids into the mitochondrial matrix, enhances fatty acid utilization and energy production. Carnitine supports healthy cardiovascular system function and promotes recovery from muscle fatigue after vigorous exercise.*

Alpha Lipoic Acid

With beneficial effects on the whole body including the liver, eyes, brain, pancreas, kidneys and skin, Lipoic Acid functions as a coenzyme essential for ATP production and cell efficiency. Lipoic Acid demonstrates broad-spectrum antioxidant activity. It is able to quench a wide range of free radicals and has the remarkable ability to encourage antioxidant activity of vitamins C and E, glutathione, coenzyme Q10, and of itself.*
